GlobalMed®

Software Solutions

Connected care,
anytime, anywhere.

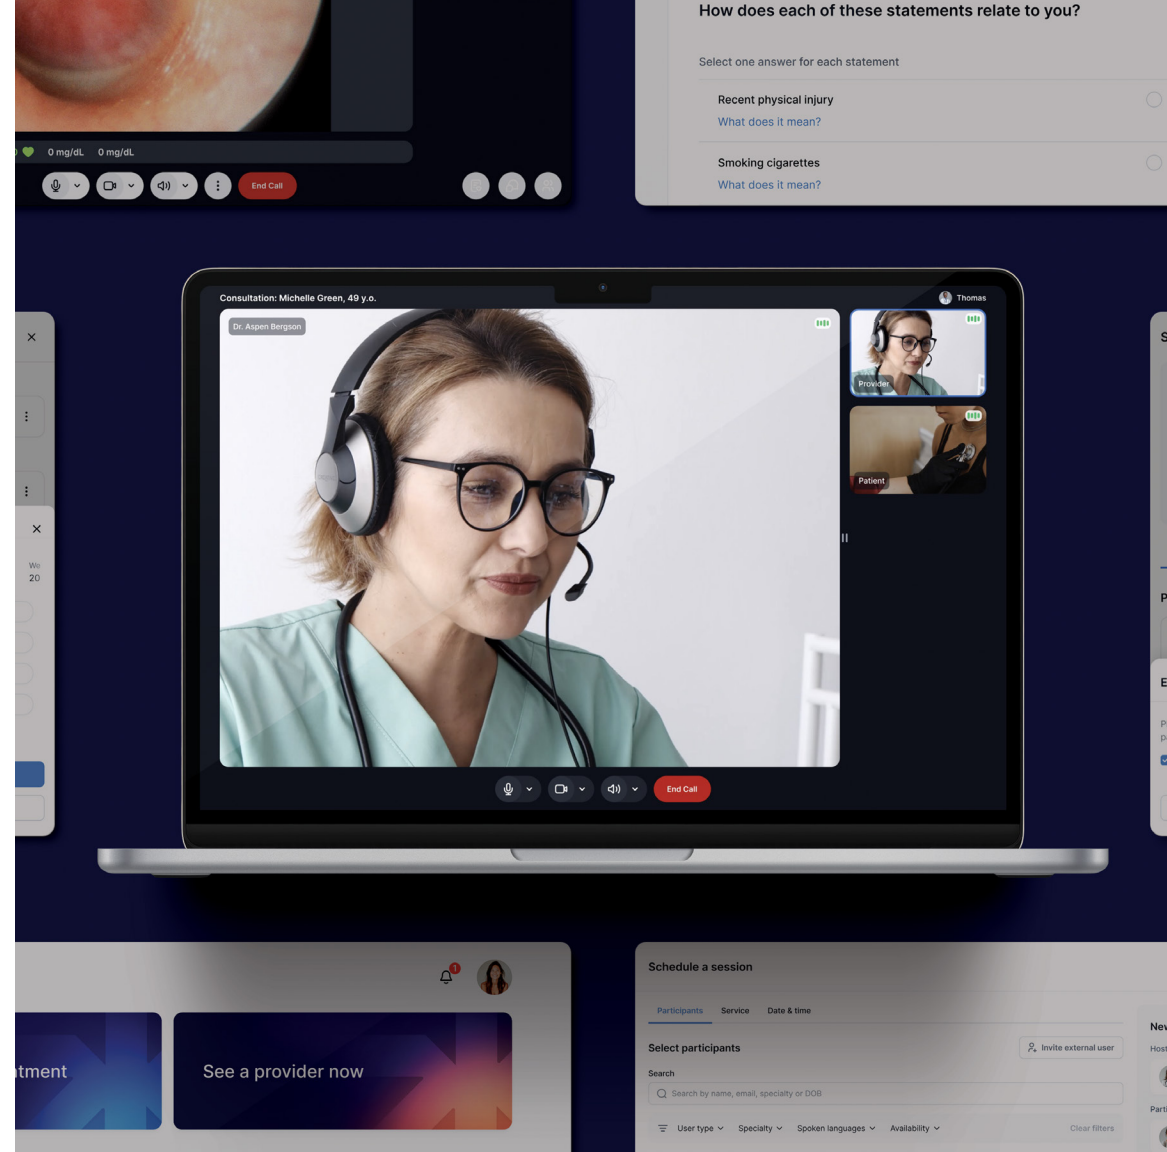

Direct-to-Patient

Evidence based. Patient friendly.

Put healthcare in the palm of your patient's hand. Our solution delivers the full experience of an in-person clinic—virtually. From completing forms and making payments to connecting with providers, patients enjoy seamless, secure access anytime, anywhere.

Built with AI to streamline workflows and reduce provider burnout, the platform integrates effortlessly with most EMRs for a truly connected care experience.

- Patient intake & data collection
- SMS & email reminders
- Virtual waiting rooms
- Patient & clinical chat queuing
- Payment collection
- Digital form completion
- AI virtual triage
- Symptom checker
- Scheduled appointments
- On-demand appointments

Clinical Care

Connected, collaborative care.

Connect with other providers and specialists through eNcounter®'s feature-rich platform. From consultations to referrals, multi-way video conferencing allows you to coordinate care in real time and share critical information to accelerate patient care plans.

- Manual & automated vitals entry
- Image measurement
- Diagnostic image capture
- Multi-way video conferencing
- Synchronous data transfer
- Store and forward
- Image annotations
- Far-end camera control
- Automated hearing test
- Secure video appointments
- Case management
- Integrate into most EHRs

The screenshot displays the eNcounter Clinical Care interface during a consultation. The main window shows a large blue area with a white waveform, likely representing a heart rate or respiratory signal. At the top left, there are buttons for 'ClearSteth' and 'Stop'. At the top right, there is a 'Tools' button. On the right side, there are two video feeds: the top one shows 'Dr. Aspen Bergson' wearing a headset, and the bottom one shows a 'Nurse' using a stethoscope. Below the main waveform, there is a 'Filter' section with buttons for 'Bell', 'Diaphragm', 'Lungs', and 'Extended', along with a speaker icon. At the bottom, there is a 'Live vitals monitor' section displaying various vital signs: 120/80, 98.7°F, 98%, 76, 135 mg/dL, and 62.87 kg. Below this is an 'Evidence (2)' section. At the very bottom, there is a 'Device: ClearSteth' dropdown menu and a row of control buttons including a camera icon, a microphone icon, a speaker icon, a red 'End Call' button, and a three-dot menu icon.

ClearSteth®

Versatile, encrypted teleauscultation.

The ClearSteth hosted software solution shares quality heart, lung, and bowel sounds for evidence-based clinical decision making.

With a simple, intuitive interface, it safely shares data through encrypted connections – protecting information while making it easy to connect to remote clinicians.

Available as a standalone application or as an integrated application in eNcounter®.

- Unmatched acoustic clarity
- Real-time audio streaming
- Full frequency control
- Zero video compression

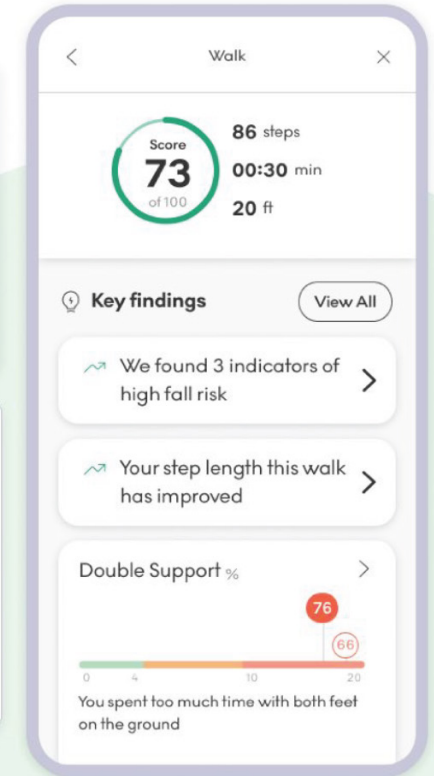

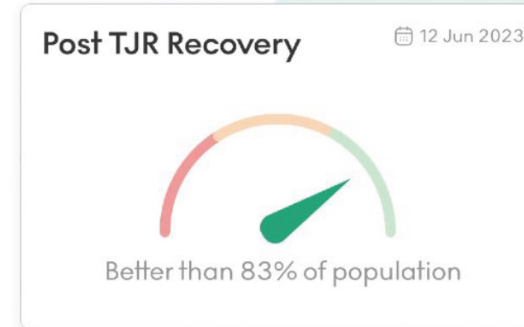

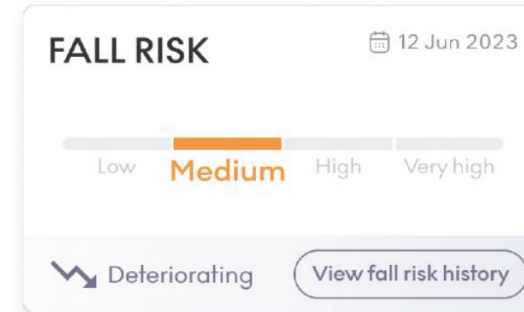

OneStep

From everyday steps to actionable data.

OneStep transforms any smartphone into a clinical-grade motion lab, delivering instant gait analysis and mobility insights—anytime, anywhere.

Clinicians can monitor progress, detect risks, and make informed decisions without extra hardware. The result is smarter, more proactive care that improves outcomes and quality of life.

- No wearables, no hassle
- Easy to use, seamless monitoring
- Accurate results within seconds
- Measures real-life conditions
- 30+ objective indicators captured
- Motion intelligence

GlobalMed®

Wellness Applications

Wellness and resiliency
in your pocket.

MoodHacker®

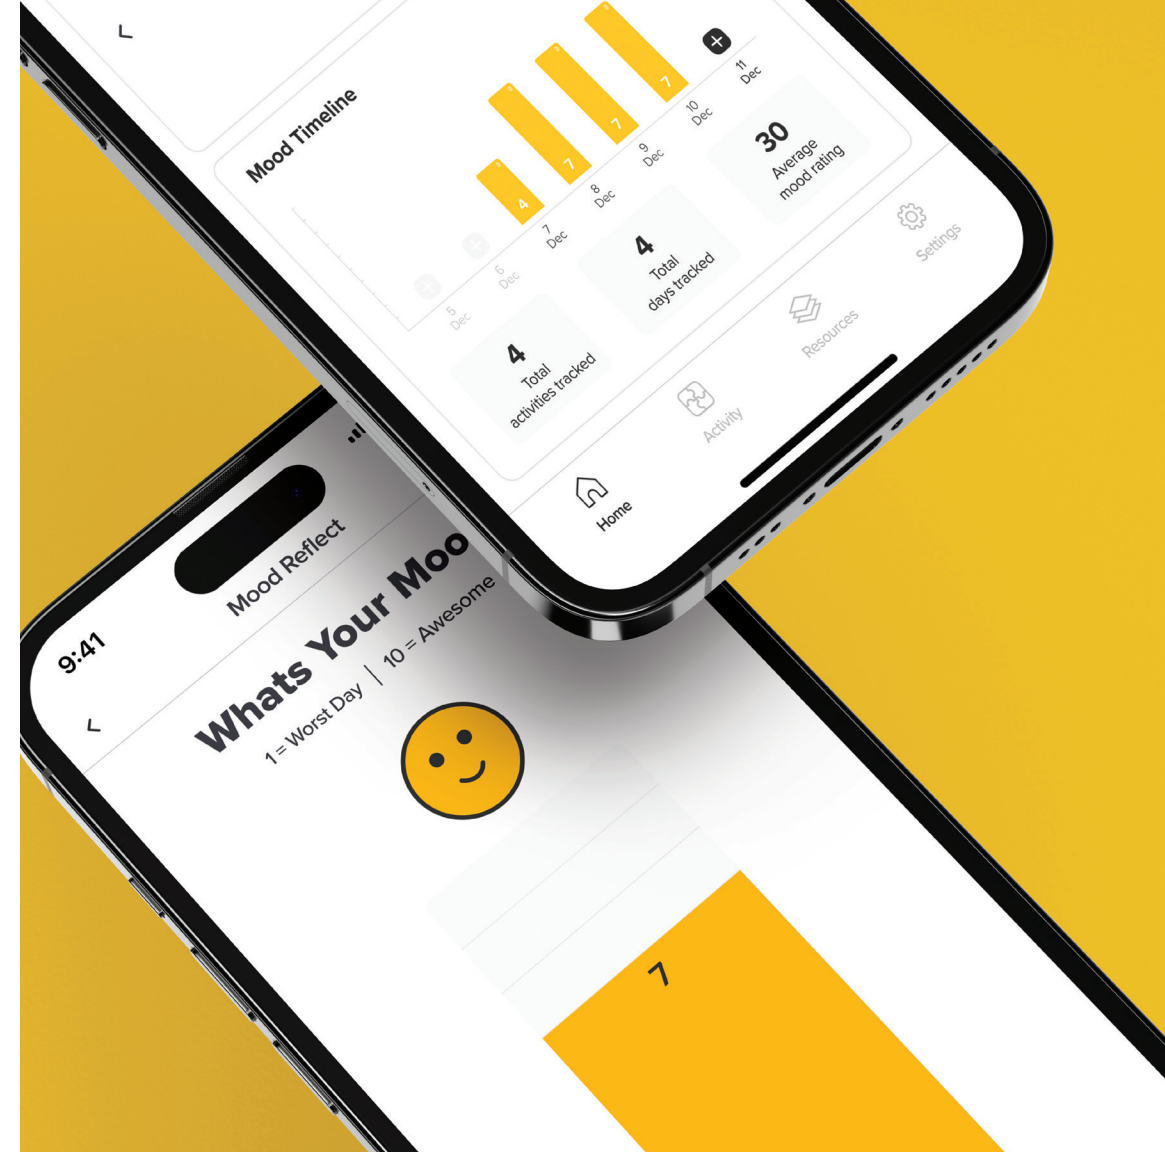

Take control of your mental health.

Based on Cognitive Behavioral Therapy (CBT), positive psychology, and self determination theory, MoodHacker offers scientifically validated help with your mental well-being.

Depression can be linked to almost every chronic condition, such as diabetes, hypertension, heart disease, arthritis, pain, COPD, addictive eating patterns, and insomnia.

MoodHacker supports your mind and body by helping you build resilience and confidence.

- Scientifically validated
- Create healthy habits
- Personalized messaging
- Relevant feedback
- Reduce anxiety
- Reduce depression
- Self managed
- Highly engaging

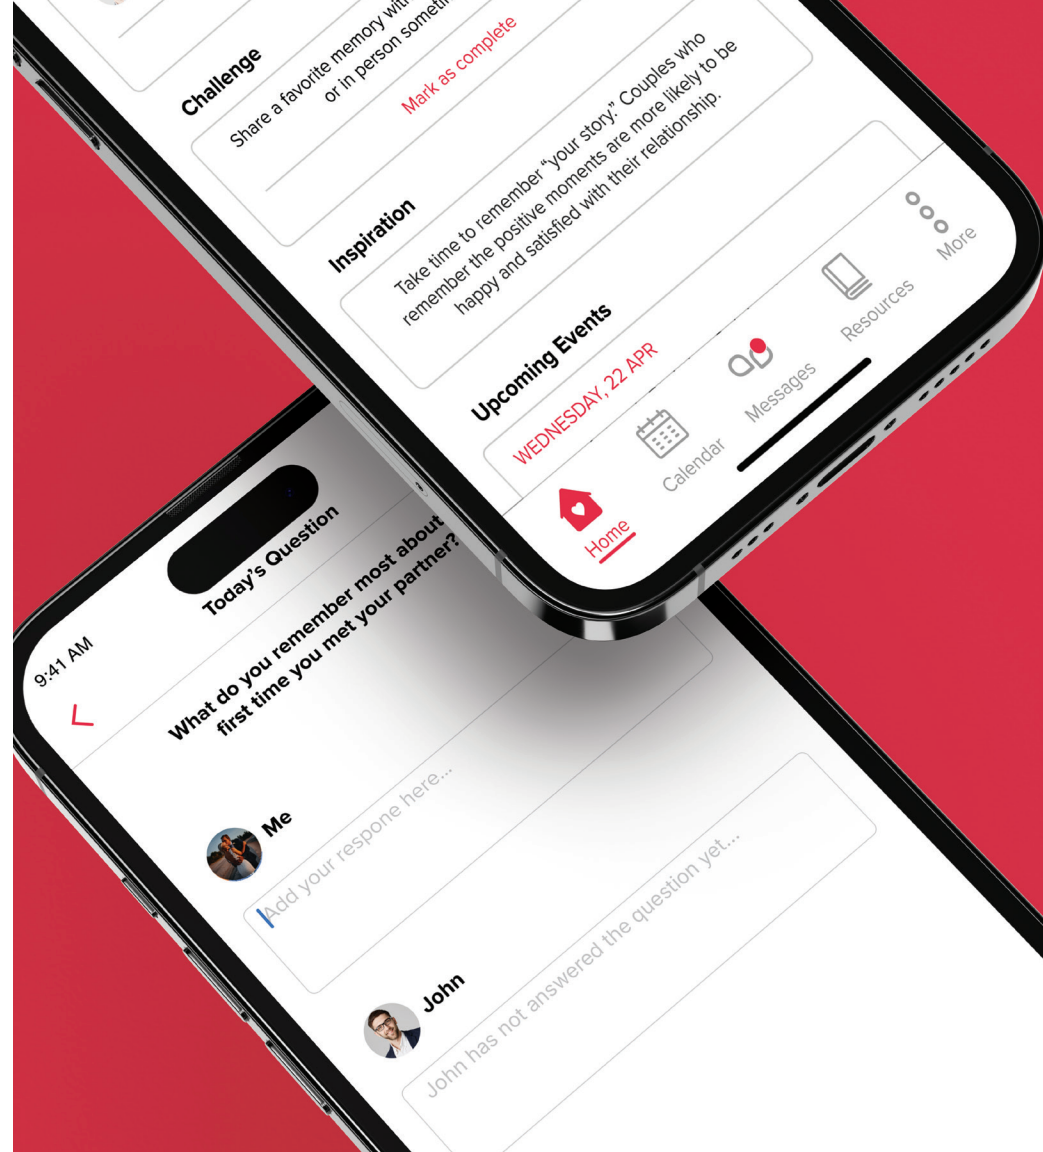

LoveEveryDay®

Invest in your relationship. Improve your health.

Marital discord can take a toll on your well-being, contributing to stress, anxiety, depression, and even substance abuse. But with LoveEveryDay, couples find a powerful path to healthier and happier partnerships.

Through quality interactions, couples reconnect emotionally, renew attraction, and strengthen long-term bonds. Users consistently report that LoveEveryDay has significantly improved their sense of partnership and commitment while cultivating supportive behaviors.

- Clinically researched
- Stay connected
- Confidential & secure
- Quality interactions
- Build resilience
- Complimentary to care
- Increase attraction
- Highly engaging

FamilyHuddle®

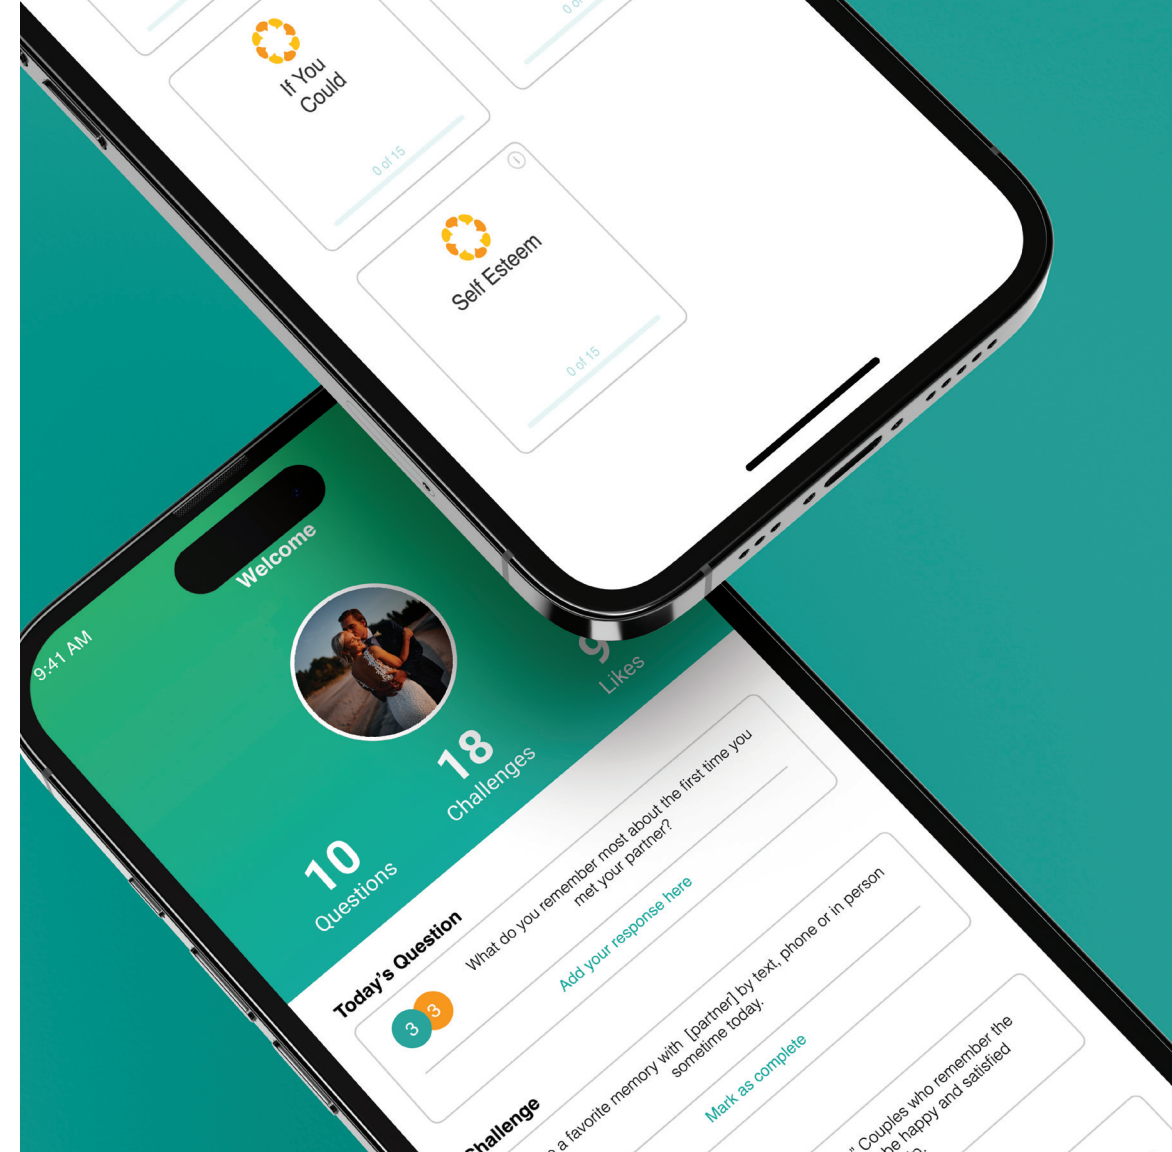

Transform your family dynamic.

Strengthen family bonds by learning to consistently pay positive attention to one another.

Our app guides your family members through thoughtful questions about yourselves and each other, sparking enlightening conversations.

By sharing answers, you'll unlock fun bonus activities designed to encourage meaningful interactions, fostering a cycle of reciprocal emotional boosts.

- Clinically researched
- Quality interactions
- Schedule management
- Daily questions
- Easily accessible
- Healthy communication
- Bolster family bond
- Highly engaging

GlobalMed®

Delivery Systems

All-in-one solutions
for every use case.

ClinicalAccess® Pro Connect

Our most robust, all-in-one telehealth solution.

Available in single and dual 24" monitor options, the ClinicalAccess Pro Connect is a powerful medical grade mobile station designed to empower your practice.

A high acuity differentiator, it can be configured with a variety of integrated medical devices at the point of care – streamlining workflows and boosting efficiency.

- Digital locking device storage
- Ergonomic design
- Fleet management
- Supports dual monitors
- Customized configurations
- Electronic height adjustment
- Intuitive work station
- Illuminated work station

ClinicalAccess® Pro

Cost-effective telehealth efficiency.

Lightweight and highly versatile, the ClinicalAccess Pro can be configured with integrated medical devices at the point of care, improving workflows and documentation.

The station's adjustable height, lockable holder, and articulating arm make it easy to maneuver to accommodate patient needs.

- Versatile & lightweight
- Low cost & accessible
- Articulating arm
- Easy maneuverability
- Lockable tablet holder
- Adjustable height

ClinicalAccess® Kiosk

Our most secure desktop telehealth solution.

The ClinicalAccess Kiosk brings modern telehealth to life, combining durability, flexibility, and security in a sleek, professional design.

Perfect for clinical and behavioral health settings, it supports self-service or facilitated visits, helping providers connect with patients seamlessly while keeping sensitive data secure.

- 22" touchscreen monitor
- Wireless & LAN with PTZ camera
- Medical device storage drawer
- CAC/PIV reader
- HD webcam and speakerphone
- Lockable USB I/O panel
- Wall or tabletop mounting
- Durable steel design

WallDoc®

Flexible, stable, and secure.

The WallDoc transforms any clinical space into a high-functioning telehealth hub. Designed for clinical and behavioral health operations, this sleek, wall-mounted kiosk delivers secure, seamless patient interactions while maximizing space efficiency.

Ideal for both self-service and facilitated visits, WallDoc keeps medical devices organized and patient data protected, all within a modern, professional design.

- Highly configurable
- Intuitive interface
- Secure electronics
- Easy to service
- Self-service touch screen
- Lockable storage

Transportable Exam Station™

Purpose built for challenging environments.

Specifically designed for deployment in austere areas, our ruggedized exam station transforms challenging environments into functioning clinics.

Wi-Fi, cellular coverage and SATCOM ensure critical communication in even distant locales, bringing medical care to patients when they need it most.

- Portable
- Ruggedized case
- Customizable integrated devices
- Gorilla Glass tablet
- Hot swappable battery and charging system
- Water & dust proof
- Secure device storage
- Wi-Fi, cellular, SATCOM
- Video conferencing enabled
- Pressurized for austere environments

Transportable Exam Backpack™

Bring clinical care to underserved locations.

This lightweight backpack delivers comprehensive virtual examinations wherever you go. Equipped with a laptop and diagnostic tools, this mobile clinic in a backpack extends your reach into rural and underserved communities.

- Foam device inserts
- Remote environments
- Laptop included
- Ample storage
- Universal USB compatibility
- Customizable integrated devices
- Lightweight
- Hands-free mobility

Transportable Audiology Backpack™

Bring quality hearing care to any location.

Our lightweight backpack transforms any location into an audiology clinic.

It includes every tool needed for remote audiometric assessments, self-directed exams, hearing aid adjustments, and beyond.

- Image capture
- Versatile air conduction
- Self-directed exams
- Foam device inserts
- 6 data quality indicators
- Hands-free mobility

Mobile Medical Response Unit™

Adaptable medical support for any environment.

The Mobile Medical Response Unit is a customizable, rapidly deployable unit designed for healthcare, emergency response, and command operations in challenging environments.

With quick setup capabilities and a variety of configurations, it provides versatile solutions to meet critical operational needs.

- Air conditioned
- Compact & portable
- Under 10 minute deployment
- 2-person set up
- Anti-microbial UV lighting
- 6-person capacity
- Potable & wastewater hookups
- 100% sterile interior surfaces
- HEPA air filter
- Power hookups

Full-spectrum care, wherever
the mission takes you.™

**Advanced capabilities,
easily implemented.**

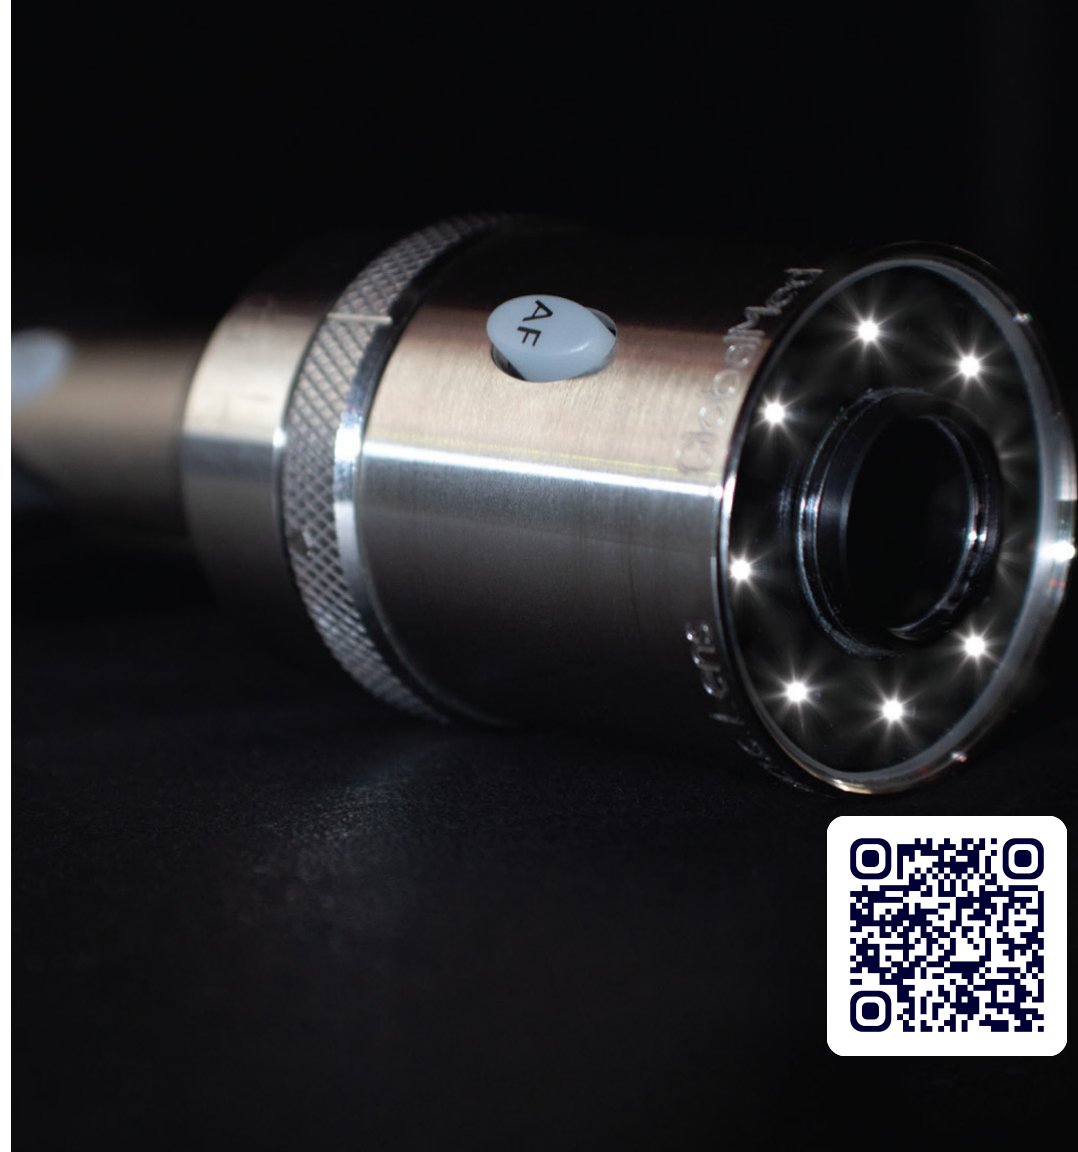

TotalExam® 3

Multi-functional visual assessments.

Leveraging over 23 years of imaging innovation, this digital camera system consists of an auto-focus lens for general examination and dermatology, and an otoscope for capturing and streaming high-quality images of the middle ear.

Designed to be lightweight and affordable, the TotalExam 3 camera was developed with the clinician and medical staff in mind.

- High-resolution sensor
- Superior low-light performance
- Extended field of view
- Auto-focus
- Intelligent frame capture
- Ergonomic grip

TotalExam® Lite

Crisp, clear, and accurate imagery.

This camera system offers an affordable and lightweight telemedicine tool for visual assessments.

An autofocus lens provides clear views for general examination, while an otoscope offers detailed and precise visualization for diagnostic accuracy.

- Extended field of view
- Optimized color
- Low-light operation
- Variable illumination
- Frame capture
- Ergonomic grip

TotalVitals®

Essential data in the palm of your hand.

Portable and powerful, our hand-held monitor digitally captures vital data instantly.

Need to make informed decisions on the go? TotalVitals puts accurate data at your fingertips. Lightweight, intuitive, and always reliable.

- Temperature
- Blood pressure
- Compact design
- Pulse oximetry
- Heart rate
- USB compatible

TotalECG®

Cardiac diagnostics made simple.

Freeing you from cables and wires, our compact electrocardiogram device features a wireless 12-Lead ECG system for mobile diagnostics.

Utilizing the robust Windows®-based CardioVu software and integrating with the Glasgow 12-Lead ECG analysis program, this small but sophisticated tool delivers detailed insights into cardiac activity.

- 12-Lead
- One-click connection
- Wireless
- High acuity
- No outlet needed
- Portable

ClearProbe®

Versatile ultrasound imaging for every specialty.

Turn any computer into a powerful point-of-care imaging system.

With two types of transducers, ClearProbe unlocks unparalleled diagnostic clarity for family medicine, OB/GYN, urology, internal medicine, and other clinical applications.

- Color flow mapping
- Two transducer types
- Flexible cables
- Lightweight
- High depth range
- USB compatible

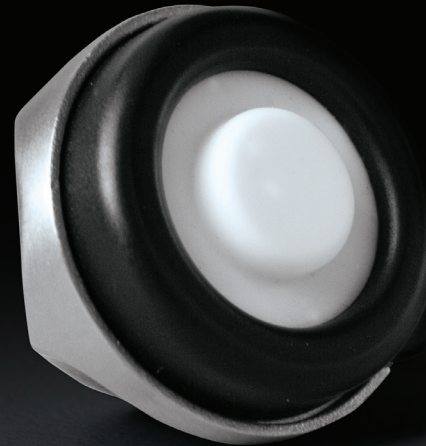

ClearSteth® Digital Stethoscope

Crystal-clear diagnostic sound.

Our patented state-of-the-art technology collects sound with the least artifacts possible, creating the ultimate telemedicine stethoscope.

Our ClearSteth Send Kit uses four unique frequency filters for superior sound fidelity – elevating your diagnostic capabilities.

- PC compatibility
- Tablet compatibility
- No buttons or dials
- Instant start up
- No calibration needed
- Ergonomic design

MouthWatch® Plus+

One-button intraoral camera.

With this essential teledentistry camera, crystal-clear oral imaging shows your patients any needed treatment.

Capturing high-resolution images of teeth and gums, its simple one-button operation makes intraoral photography quick and convenient – and easily integrates into most leading dental imaging software systems.

- Glare-free images
- Over a billion color shades
- Fixed-focus
- 1080p HD
- Custom button configuration
- Adjustable illumination

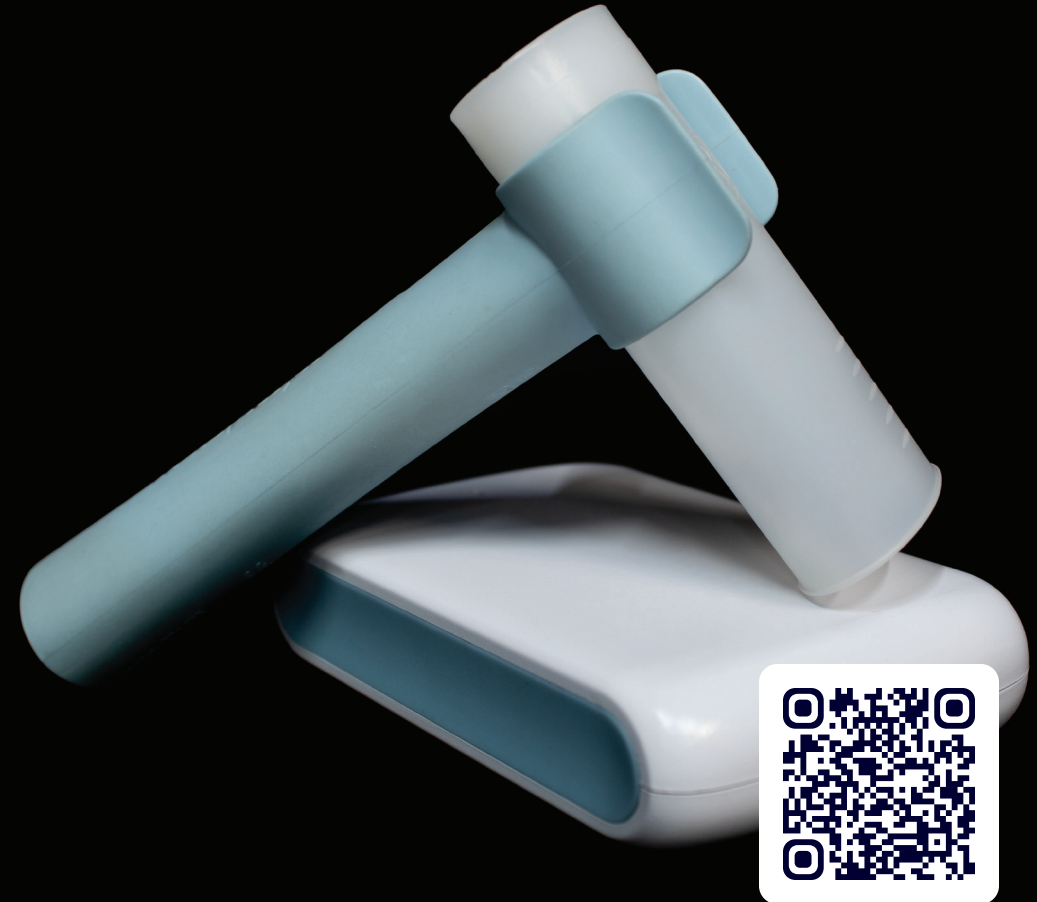

Digital Spirometry

Virtual pulmonary management.

Pulmonary care is secure and efficient with our advanced spirometry suite.

Intuitive to use, with a single point of connectivity and common interface between modalities, the spirometry suite allows you to effortlessly conduct two exams at one time through one protected solution.

- Incentive screen
- Provides feedback
- Ambient pressure & temperature
- Instant performance verification
- Clinical accuracy
- FVC, SCV, MVV, and more

otoCam™ 300

Simplicity in otoscopy.

Our leading audiology tool delivers crisp, full-color images of the inner ear, thanks to a powerful light source and advanced video technology.

Small and easy to hold, the otoCam 300 conveniently connects via USB and integrates with our eNcounter® software. All patient images are seamlessly saved in DICOM format in your electronic medical record system.

- USB direct connection
- Built-in heating system
- 24 frames/second
- Freeze frame
- Plug and play installation
- Lightweight design

GlobalMed®

Trusted Worldwide

A world without
disparity of care.®

Who We Are

A global leader in virtual health.

In 2002, a Marine Corps Reserve Veteran founded GlobalMed® to bring healthcare access to the underserved. Today GlobalMed powers the world's most advanced virtual health technology platform –the only platform that can support a patient at any point in the continuum of care.

Integrated software and data-capturing tools empower providers to transform patient encounters with evidence-based treatment and improved outcomes. Our unified platform is feature-rich, providing everything needed to manage capacity, reduce costs, expand patient care, and deliver responsible medicine.

Specializing in both federal and commercial spaces, GlobalMed technology has enabled approximately 60 million consults in nearly 60 countries. Built to the highest standards of security and compliance, GlobalMed's virtual health platform has earned the U.S. Defense Health Agency's Authority to Operate on the DoD network. It has been used worldwide from the VA and White House Medical Unit to rural American hospitals, correctional facilities, oil rigs, and even remote villages in Africa.

What We Do

Digital health across the continuum of care.

Healthcare Solutions

eNcounter® Software Platform

Secure software enabling seamless remote healthcare.

ClinicalAccess® Stations

Digital health stations for your care anywhere, anytime.

Integrated Medical Devices

High-quality clinical devices delivering easy, precise care.

Wellness Apps

LoveEveryday®

Sparks positive interactions and emotional connection in couples.

FamilyHuddle®

Fostering robust communication within families, young and old.

MoodHacker®

Practical, real-life intervention to develop healthy habits.

Clinical Intelligence

AI-Driven Support Tools

Advanced tools used to enhance and optimize patient care.

Data Management

A secure digital ecosystem for critical healthcare data.

Where We Are Integrated

From far off oil rigs to patient homes.
