

What's New for Users

- .NET 8 compatibility: We have upgraded our application framework from .NET 6 to .Net 8 to leverage the latest performance improvements.

What's New for eMDR

- Build eMDR with the ability to push and pull information to and from NextGen EHR using their API For Community Health Net.

What's New for eNcounter

- Reliability and Performance Enhancements: We continue to improve the reliability and stability and modernization of eNcounter server, setting the groundwork for scalable servers (Scalability V1).
- Updated Password Requirements: We've updated our password policy to enhance security. Passwords must now be at least 15 characters long and include uppercase letters, lowercase letters, numbers, and special characters.
 - Impact:
 - The new password requirements will take effect the next time users have to reset their password.
 - New Users: Must follow new requirements during registration.
- Bugfixes to eNcounter3: This release remediates bugs to improve system stability and performance.
