

What's New for Users

- Increase password security by ensuring at least 8 characters are changed each time users update their password.
- Bugs fixes to eNcounter and eView where E3 automatically rejects all incoming calls because it's assuming it's still in an active call.

What's New for ClearSteth

- No changes for this release.

What's New for Administrators

- Bug fixes to eNcounter server and License Manager.
- Increased password security.
