

TotalExam® 3.2

This digital camera system consists of an autofocus lens for general examination, and an otoscope for capturing and streaming high quality images of the middle ear. Designed to be lightweight and affordable, the TotalExam camera was developed with the clinician and medical staff in mind. Leveraging over twelve years of innovation in the imaging space, the TotalExam Camera delivers intuitive imaging and video.

#### MEDICAL USE CASES

---

audiology

ophthalmology

dermatology

intraoral

## TOTALEXAM<sup>®</sup> 3.2 CAMERA

---
